MASTERS OF ITALIAN LIVING

EXTETA
EXTERIOR LIVING

Defining what art is could be one of the hardest things to do. Yet, when you find art, when you see art, it becomes so unpredictably easy to recognize. You cannot tell if it is by the smell of it, by the shape of it, by its touch, vision, or feeling. Suddenly, you know what art is.

The craftsmanship Made in Italy

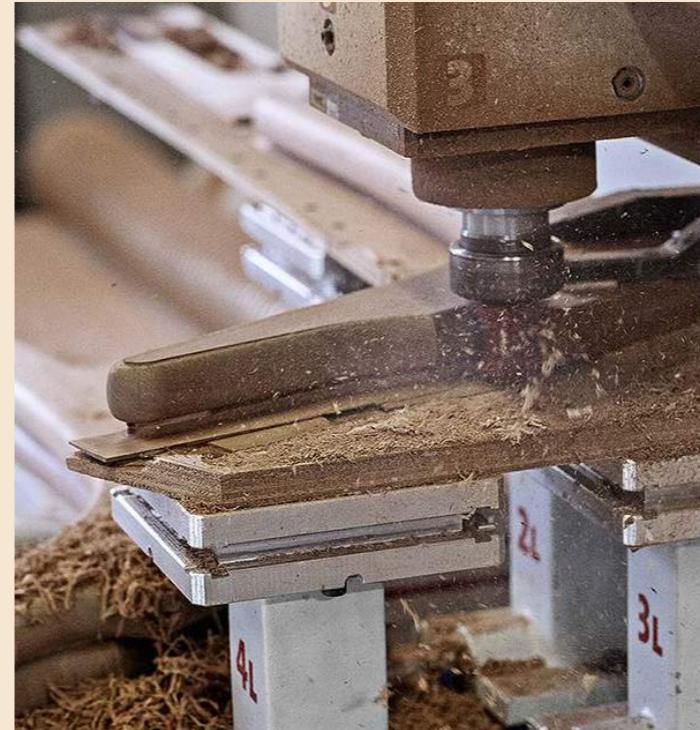

Exteta designs the Italian art of living in the form of outdoor elements. Each piece is a window onto a landscape composed of the finest materials and craftsmanship. Every collection is a painting depicting the lifestyle of those who look for moments of perfection, a dreamy mood to simply embrace. The Exteta exterior living philosophy is to make products characterized by their uniqueness. Only the most beautiful and resistant materials are shaped by authentic Italian craftsmen. Their skilled hands are the tools needed to carve emotions out of nature. These masters' incredible work preserves ancient handcrafting techniques with technologies

able to give new high-performance features to outdoor elements. Born from the interpretation and inspiration of Art Director Massimo Castagna, the design connects the feeling of each piece to an exclusive Italian experience. Exteta creates custom projects that bring those feelings anywhere in the world. By tailoring each project to the client's needs and wishes, Exteta takes the level of craftsmanship to the highest standards in quality. A perfect garden, a terrace overlooking the sea cliffs, a rocky shore on a blue lake, a yacht with no destination: Exteta's pieces suit the space of everyone's Italian dream.

Art is right in front of you, through a window overlooking the stunning sea, while the wind gently squeezes the perfume from the lemon zests warmed by the sun. It is in the fresh shadow of a flowering garden in the hot summer. It is in the smell of coffee you bring outside to enjoy life as the daylight begins to shine. Imagine if you could experience the Italian art of living, wherever you want to be. You can.

To be the translators behind an emotion like this, the ones who put that kind of all-senses rapture into a beautiful object, it takes to be real masters of living. It means to be able to tell the beauty cherished in the natural history of things, in their DNA, written in a timeless dimension to be picked, harvested, evoked like memories of someone else's life.

Michelangelo Dinner Table

Monomaterial

MINIMALISM top

The monomaterial table plays with lines and thicknesses with minimalist air. The top is very thin compared to its entire surface, while the corners are rounded to accompany the teardrop legs.

WHITE TEARDROPS legs

The Michelangelo table legs are made from blocks of solid marble. The tapered shape is the result of architect Massimo Castagna's study on the subject, inspired by the teardrop cut of the golden ratio.

ARTISTIC STATEMENT masterpiece

From its name to its essence, the Michelangelo Table is an artistic statement. The compound of marble beauty, sculpted from a timeless and evocative material, resembles a powerful, classical masterpiece.

Michelangelo, the main table in the new Exteta collection, is a piece made entirely of marble with extraordinary elegance radiated by the material's expressive power. Together, the table's natural marble veins and sinuous leg lines form a timeless outdoor element.

10th Kitchen

Suspended beauty

10th Kitchen is characterized by timeless elegance and material refinement thanks to a noble use of marble. The natural marble grain makes each slab a unique aesthetic experience, in addition to its easy maintenance and functional ability to resist in the outdoors. The top is composed of minimal lines, supported by hand-etched iron legs, in perfect balance with an evocative setting. What results is a combination of noble and natural materials that elevates the aesthetics of gardens and terraces. The island offers mobility and enjoyment while immersed in the open air surroundings.

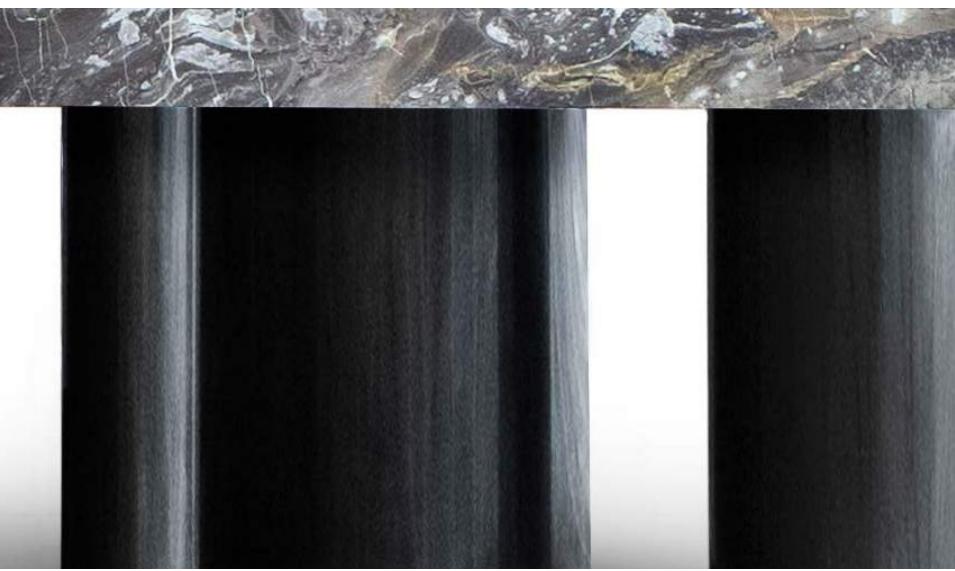

INTEGRATED FUNCTIONALITY accessories / cooking system

To fully enjoy the outdoors, exclusive accessories and Exteta cooking systems available for the 10th Kitchen are made in stainless steel. All appliances are discreetly integrated and, when not used, disappear from view by closing the sliding top.

PERFECT BALANCE legs

The legs, with different diameters and distributed asymmetrically, create a perfect balance of movement. Made of etched iron, they are available in rust and forest finishes. The streaks and reflections from acid etching make each element truly one of a kind thanks to Exteta craftsmen's artistic handmade process. The legs have another important technical and aesthetic function of hiding the equipment passage from view.

FLUIDITY AND MOVEMENT sliding top

The accessories and cooking systems to be inserted in the kitchen are covered by a sliding top that protects them from weathering. The top, when opened, becomes an elegant table that completes the 10th Kitchen features.

Roller Kitchen

Total freedom

A new concept of kitchen, in motion. The Roller Kitchen embodies the desire for outdoor freedom and informality by making every feature of the kitchen mobile. The Roller Kitchen is available in two modules, 120 and 180 cm. Its lightness and ability to move break from the kitchen's conceptual and aesthetic limits with elegant lines, details, and contrasts between the purity of the steel and the warmth of the wood.

PURE ELEGANCE top and handle

The stainless steel top adds a contemporary flavor to the material's functional characteristics. Resistance to impact, scratches, external agents, corrosion, and deterioration caused by wear are combined with simple and linear aesthetics to embrace every outdoor scenario. The finish gives a traditional material, considered cold and aseptic, a new warm, bright, and shining soul that creates a special play of light and reflections. The curved steel handle is an accessory that makes moving even more fluid and gives the Roller Kitchen a retro detail.

MINIMAL LUXURY cooking system

The exclusive Exteta cooking accessories and systems available for the Roller Kitchen are made of stainless steel for outdoor use. The kitchen becomes a unique and personal project, adapting to different needs and preferred cooking methods thanks to a wide range of customizable elements, such as the teppan yaki hotplate, perfect for an outdoor BBQ.

TECHNOLOGY AND HANDICRAFTS doors

The Roller Kitchen doors are the result of a new technology developed by Exteta that combines an aluminum honeycomb panel with the naturalness of solid mahogany. The door handle celebrates the master craftsmen's ability to artfully craft solid wood based on the ergonomic study of the opening gesture.

Levante Chair Lightness

The Exteta Levante Chair and the Levante Armchair are works of fine Italian cabinet-making. The structure is made of hand-carved mahogany components that flow into one another, inspired by nature and by the beauty of tree branches. Mahogany, a noble and extremely resistant wood, makes it possible to create this masterpiece with minimal sections and thicknesses to give it a feeling of extreme lightness.

GENUINE LEATHER seat and backrest

The seat and backrest are made of genuine leather treated for outdoor use to always ensure the product's maximum tightness and resistance in the outdoor environment.

ELEGANCE AND FINESSE armrests

The armrests recall the marine environment and add to the feeling of lightness emanating from the Levante Chair and Levante Armchair. The armrests can also be added to the chair as an aesthetic and functional element to the favorite seat.

NOBLE CRAFTSMANSHIP structure

The wood elements of the structure follow the most impressive traditional Italian craftsmanship, elevating it with a design deeply rooted in the beauty of nature. The handmade connections among the different elements are the precious artisanal treasure of this piece.

Tree Light Organic outdoor

NATURAL EMBRACE lamp joints

The branches of the tree gently surround the lamps of the lighting system like if they were ripe fruits hanging, ready to be picked.

SQUARED TRUNK solid base

The different branches follow the trunk to the very base, creating a peculiar design element where they become layers of an elegant connection with the burnished brass solid base.

UNIQUE BRANCHES separating layers

Every lamp separates from the central core of the trunk in the most unique way, dividing the layers originating the branches inspired by the organic nature of the trees.

The bold design of Tree Light follows the organic uniqueness of nature, with irregular parts that create flexible landscapes in a lighting landscape. The piece gives full freedom to creativity, allowing the most unique compositions and shapes, from the number of branches to their positions and heights.

Side Accessories Michelangelo Dinner Table

01 – Vertical Garden
02 – Hemingway Lamp
03 – Levante Chair

01

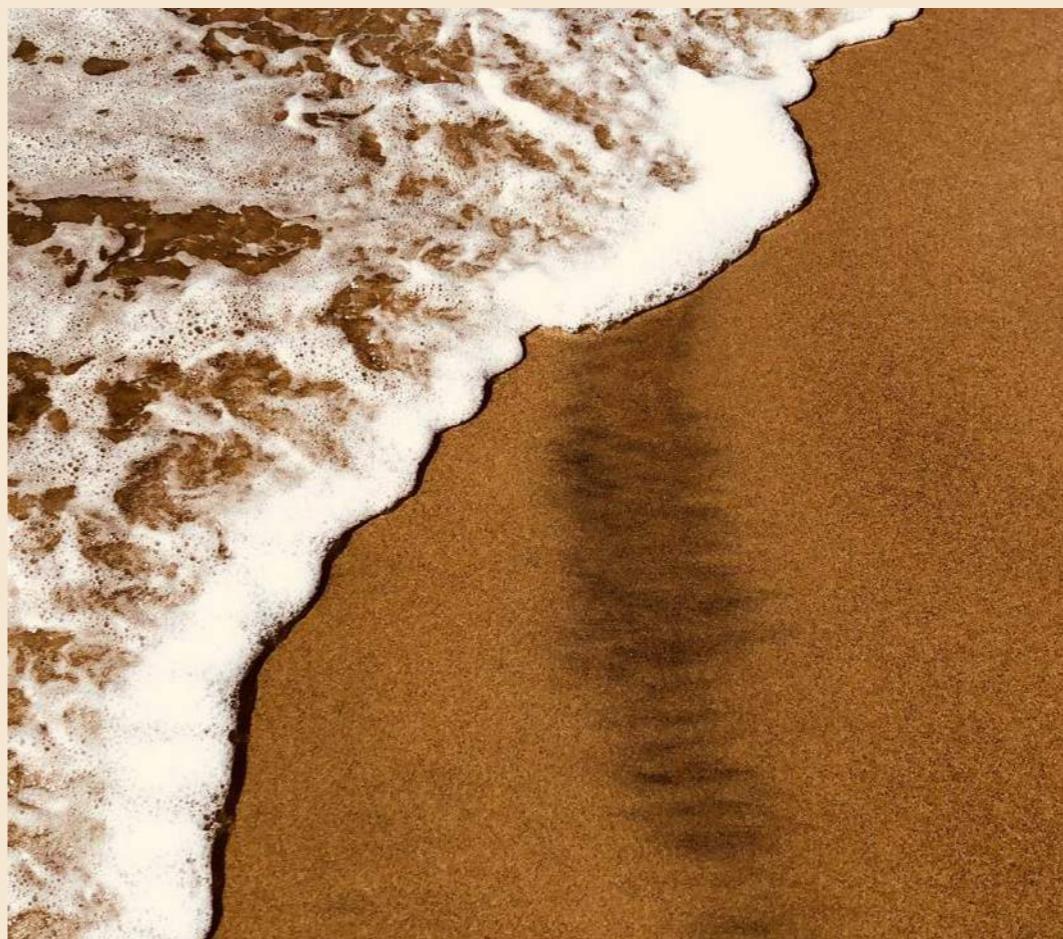

02

03

The thin structural lines of the Michelangelo Table become the leitmotiv of a unique outdoor space, extending its essence of lightness to the Hemingway Light, Vertical Garden, and Levante Chair side elements.

Inspiration becomes the means to translate the language of a strong cult of beauty into masterpieces that embrace bodies and souls. Everyone wants to speak that language, made of refined movements and textures. Everyone wants a hint of that atmosphere only Made in Italy can create.

Levante Sofa with Extetiflex / Weighted Backrest Seating system

Lightness and softness are the distinctive features of the Levante Sofa, an upholstered structural piece with mahogany legs that facilitate movement and the creation of new environmental compositions. The backrest system and the side elements define its identity and personalization.

DYNAMISM weighted backrests

If you want complete freedom to move the elements, the Extetiflex backrests can be replaced with the Caprera backrests which do not require a fixed structural support.

MODULARITY modules

The Levante Sofa modules were designed for two depths to adapt to any space and create unique landscapes. Dismantled and reconfigured, it continuously transforms functionality and aesthetics based on the position of the modules, frames, seats, backrests, and side elements.

WEAVING ART extetiflex

A mahogany structure evokes the traditional artisan loom, and like a canvas, the Extetiflex is handwoven on it. The waterproof material is available in three colors and composed of PVC, resistant to UV rays and weathering, making it perfect for the outdoors. The backrests and side frames are available in two heights. The lower version has a mainly structural function, while the higher one can also act as a screen and space divider.

Biscuit Coffee Table

Material power

A majestic impact for a coffee table exploring the true power and essence of the stone. Biscuit Coffee Table takes the monomaterial look to its finest level.

JOINT DELIGHT legs and top fit

The balance between the elements is the most iconic feature in the design of the coffee table, which connects the weights of legs and top with visible joints between the parts.

BISCUIT EDGES smoothed lines

The edges recall the sweet lines of a rounded biscuit with an elegant craftsmanship work that empowers the beauty of the material.

STRONG FEEL monomaterial look

The materials selected are the most unique stone elements presenting elegant veining and encapsulating the visual strength of a single, powerful essence.

10th Butterfly Nautical mast

Enhancing the outdoor experience by providing fresh shelter from the sun. 10th Butterfly is a refined micro-architecture in mahogany creating a comfortable and elegant space in the outdoor living. Recalling the nautical style, the curtains play with the structure in wood creating an irregular game of shadows going with the wind.

SHINY FINISHING masts base

The stainless steel bases create shiny reflections besides giving solidity and stability to the masts, a detail that catches the eyes contrasting with the wood elements.

UNFOLDING SAILS string joints

The nautical systems inspire these joints connecting the curtains to the beautiful standing masts, making it both a unique aesthetic and a functional element.

MARINE KNOTS luxury finishes

The details enrich the masts with unique nautical elements like the knot holders on the wood structure recalling the luxury yacht style.

Caprera Sofa - by Massimo Castagna

Caprera Sofa Seating system

The Caprera Sofa is not just a sofa but a seating system that embraces the space with its infinite compositional possibilities. Born from the idea of a real custom experience tailored to individual desires, the Caprera Sofa combines the simplicity of its lines and the natural harmony of mahogany with a wide range of materials that enrich the piece with unique movement.

MODULARITY modules

Available modules can be juxtaposed with one another, articulating the sofa just the way you want to. You can choose modules with the same depth, or elements such as poufs and islands, to give life to angular compositions and new exterior landscapes. As the outdoor scenery changes with the seasons and with time, the Caprera Sofa modules fill the space with timeless design and comfort.

EXTREME COMFORT accessories

While the accessories, like the structure, are made of mahogany, the soft lines of the cushions interweave shapes that perfectly fit the sofa and make the seat even more comfortable.

DYNAMISM backrests

It is possible to experience the sofa as an island to relax on or to sit in a more traditional way thanks to the backrests and cushions. The backrests are not fixed and can be moved, rotated, and positioned on the modules in multiple directions to experience the outdoors in an informal and personal way.

Vieste Armchair

Iconic touch

The summer breeze caressing the cliffs of Vieste evokes a design both light and elegant, classic and contemporary. Vieste Armchair is an iconic looking seat bringing a vintage feel reinterpreted following the modern trends. The different materials connect contrasts in the most harmonic way.

SMOOTH SENSATION rounded edges

Recalling the nautical most refined style, the edges of the armrests and the structure are delicately rounded and smoothed. The armrests draw inspiration from the design of nautical oars, making the ergonomic comfort lead the seating experience.

HANDMADE DELIGHT precious finishing

The needlework details are a precious gift enhancing the craftsmanship look of the seat, a feature that adds a sense of tradition deeply connected to its cultural roots. The stainless steel T-shaped feet enrich the design with a contemporary touch.

JOINT PLAY design connections

The backrest lines follow the classical echoes of nautical and vintage design style, smoothly jointing contrasting elements of the seat.

Soft Chaise Longue

Horizontal pleasure

In the landscape of the exterior living composition, Soft Chaise Longue establish new volumes of the outdoor, with wide and longue seat with a soft touch. The structural polyurethane foam gives extra comfort and elegance with the external lining in outdoor fabric and outdoor leather.

JOINING VOLUMES light and comfort

The use of nautical polyurethane foam for the whole structure, playing with different consistencies and shapes, create the supreme level of comfort and seating freedom, without compromising the wonderful lightness of the design.

MONOLITHIC ELEGANCE structure cuts

The polyurethane foam gives a solid and monolithic look to the soft seat, emulating the rocks of the Italian coasts laying one next to the other. The monolith is cut into different volumes by strings that creates solid shapes from the foam, acquiring a unique look and preserving all its comforts.

BONDING DETAILS enriching needlework

Every string and edge are enriched with the finest needlework technique, changing the tactile experience and giving a nice contrasting feel with the smooth parts.

Hemingway Lamp

Pure elegance

A steel structure with a special outdoor powder coating matching a linear design: Hemingway Lamp creates a unique play of lights for unforgettable nights outdoors. The lamp moving system becomes an element of design itself, with refined details enriching the apparently minimal look of the lighting.

PULLING BALANCE wire system

The wires in nautical rope become a visible and iconic part of the design of the lighting, balancing the elements and allowing the linear movements of the lamp, which can be blocked in the different positions.

GEOMETRIC CONTRASTS different shapes

The two long arms composing the lighting form essential visual geometries, with joints connecting the rounded and squared tubulars up in the air.

NAUTICAL REFERENCES base composition

The first arm and the steel base follow a traditional nautical architecture, forming an angle that gives a peculiar sense of movement to the whole design.

Biscuit Table, 10th Butterfly - by Massimo Castagna
Montecarlo Lounge - by Ludovica + Roberto Palomba

Montecarlo Lounge

Wide horizons

The squared design of the classical sofa develops its length creating a wide horizontal landscape of comfort with multiple seats. The abundant upholstered volumes bring to the outdoor the comfort usually dedicated to the interior design. The monolithic seat with no legs makes the sofa a single block of soft relaxing experience.

FINEST SEAT abundant upholstery

Montecarlo Lounge is a modular structure that is clean, elegant and refined, to match every exterior living composition.

GEOMETRIC COMFORT squared design

The minimal design enhances the modular system of the sofa, that allows the personal taste to takeover the standards and create totally unique outdoor landscapes.

MATERIAL DELIGHT simple comfort

The linear seat and the upholstered parts are available in outdoor fabrics and leathers that embrace the soft shape of the sofa elements.

Prato Fiorito

Blossomy lighting

Lights blossom like flowers in the outdoor. Prato Fiorito mocks the moves and beauty of nature with an elegant, modular lighting system for a magic exterior living experience. The light and irregular stems are flexed to create extraordinary garden scenarios, growing both from the floor or from the ceiling.

DELICATE FLOWER small joints

The IP66 certified lighting spheres recall the organic nature of flowers and are connected to the brass stems through small and discreet joints, playing the role of the bulging flower receptacle.

UNIQUE FLOWERBED modular system

The bases of the lighting system are designed to make Prato Fiorito a stand alone piece of the outdoor or a modular element, adding more pieces in line or staggering them to create a unique composition.

GROWING STRONG solid base

The shiny effect of the burnished brass enhances the stability of the piece with thicker parts jointing the stems and a solid base giving special lights reflections. It is also available in a white finish that enhances the neutral and elegant vibe of the design.

Side Accessories Montecarlo Lounge

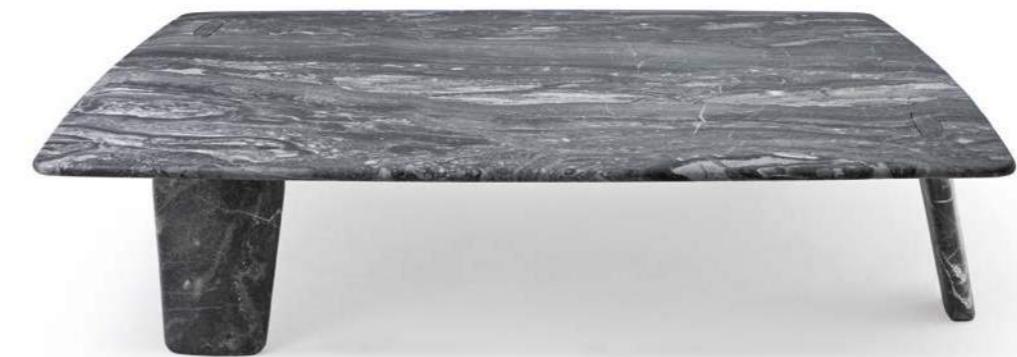

01 — 10th Butterfly
02 — Prato Fiorito
03 — Biscuit Table

01

02

03

The outdoor gets the shape of a real nautical scenario, making wind and sunshine an evocative part of the design. The fulfillment of the outdoor delight is given by the volumes and shadow plays of 10th Butterfly, together with the organic lights of Prato Fiorito and the material touch of Biscuit Table.

Levante Sun Lounger

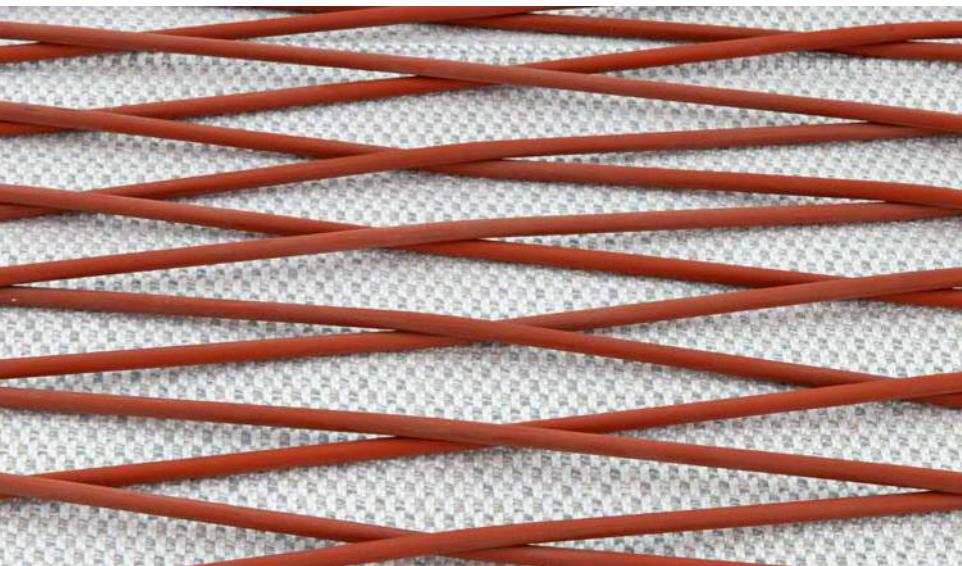

Enjoying the sun

The Levante Sun Lounger is a sunbed inspired by the nautical environment and is very light and easy to move thanks to its practical wheels. The mahogany structure, made using ancient and refined Italian cabinet-making techniques, and the Extetiflex weaves merge to create a simple product with distinctive elegance.

WEAVING ART extetiflex

The mahogany structure evokes the image of the traditional artisan loom, and like a canvas, Extetiflex is hand-woven on it. The waterproof material is available in three colors and composed of PVC, resistant to UV rays and weathering, making it perfect for the outdoors. The weave guarantees maximum hold and comfort.

ERGONOMICS AND PRACTICALITY reclining back

Thanks to the reclining back, you can choose your preferred position to enjoy the sun, sip a refreshing drink, or immerse yourself in an exciting book.

COMFORT accessories

For the Levante Sun Lounger, there is a soft mattress with a headrest that becomes an outdoor icon of relaxation.

Palau Daybed

Outdoor embrace

Palau Daybed is the embrace of the outdoor. A soft and sophisticated seat taking inspiration from the stones smoothened by the winds along the coast meets the nuances of an elegant landscape portrayed in the outdoor most sensational composition. An experience that takes the body to a natural experience.

SMOOTH LINES round design

Following the surprising natural processes, the lines of Palau Daybed recreate the shape of comfortable stones, with curved backrests refined in different sections.

RELAX DIMENSION seat comfort

The extra comfort of the upholstered structure makes the seat a dream resting spot to share or to keep for oneself. A nest suiting every seating desire.

COMPACT SOFTNESS strong shape

The seat is created to adapt and to give always thrilling feelings: the structure is resistant and flexible, so that it goes back to the original shape in time, giving a long lasting experience of new.

Lerici Armchair Vintage celebration

The important proportions of the structure and the upholstered parts create a seat that brings the outdoor in a timeless dimension of elegance. Lerici Armchair celebrates the shapes of the 60s in a totally renewed look.

COMFORT ENHANCED soft upholstery

The shapes of the design add comfort to the seat with the volumes of the soft upholstered cushions.

CONTRASTING LOOKS double materials

The backrest has a double materials featuring with two different contrasting looks and feels, to enhance the touching and visual experience and giving full freedom for unique matches.

CURVING RELAX ergonomic seat

The shape of the backrest allows a peculiar seating position that brings to the armchair feel the relax of a wide and elegant hammock vibe.

Tellaro Sun Lounger

Sharing beauty

The relaxing look of the Tellaro Sun Lounger makes the perfect poolside vibe meet the elegance of an element mixing the finest materials. The beauty of Tellaro can be enjoyed both alone or in company, with the double version putting together two full seats.

PERSONAL PLEASURE reclining backrest

The seat is composed of a fixed upholstered part and the reclining backrest, to match everyone's personal pleasure.

MATERIAL PATTERN contrasting elements

Wood, leather and fabric contrast in the different elements of the upholstered parts and the structure, matching colors and finishes in the most evocative way.

WOOD CONTOURING structure finish

The smooth and refined structure in Sapelli mahogany enhances the contrasts of the elements with the different finishes of the wood. As an extra comfort finish, wheels can be a perfect optional to give the sun lounger the easiest mobility together with a peculiar design aesthetic.

Side Accessories Tellaro Sun Lounger

01 – 10th Capote
02 – Helix Tables
03 – Nemo Light

01

02

03

The outdoor experience in the sun is a moment of pure relaxation and enjoyment for all the senses. While resting in the shade of the 10th Capote, the Levante Sun Lounger provides perfect comfort, and the Helix Table, together with the Nemo Light, keep every function close by day and by night.

Materials

Woods

Exteta uses only solid wood. Cracks and fiber movements are distinctive signs of uniqueness and quality, the purest expression of the fascinating nature of wood. Exteta exclusively uses FSC certified timber, and only trees that are replanted are selected.

MAHOGANY

Incredible colors and veins: the only quality of mahogany used by Exteta is Sapelli which has the most refined range from shades of yellow to shades of red.

Natural preservative: thanks to its high density, Sapelli mahogany is difficult for pests to attack and is very resistant to accidental impacts.

Its traditional use in the nautical field demonstrates its application potential. Sapelli mahogany is a wood with one of the highest stability index in nature.

Aging: over the years, Sapelli mahogany's natural color will turn into a fascinating silvery grey. The mode and speed of this process can vary significantly depending on the environmental conditions that the material is exposed to. These changes are exclusively aesthetic, without affecting its durability.

BARRIQUE

Barrique is achieved thanks to an oxidative process that gives the mahogany its beautifully intense brown color.

LUCIDO MEDITERRANEO

Lucido Mediterraneo is the technique of applying a glossy varnish in 11 steps to make the mahogany extremely resistant in the outdoors, the best option for the marine environment. The Lucido Mediterraneo is brilliant to the eye and silky to the touch.

INDIGO

Exteta uses only solid Harborica® wood. The solid wood is entirely saturated through an autoclaving process, thus undergoing a processing cycle

that totally transforms the color and leaves the structure unaltered. To increase the durability of the material, a specific product that enters the lymphatic vessels throughout the mass and makes it remarkably resistant to weathering is added. The result is one of a kind material: a dark grey wood with blue reflections.

Natural preservative: thanks to the high performance treatment, Indigo acquires very high durability and resistance.

RED CEDAR

Exteta uses only 2 Clear, WFP selected Canadian red cedar.

Colors and veins: the natural color of freshly cut red cedar is a warm copper, with shades ranging from yellow, to beige, to pink, to violet and veins that intensely vary even in the same sourced plant.

Natural preservative: the Canadian red cedar is the most durable wood in the world. Its fibers contain natural preservatives that diffuse a pleasant and characteristic fragrance that repels insects and mold, making it unassailable by bacteria. The plant's ability to produce these agents increases over time. The Canadian red cedar lasts decades, even in harsh environments.

Marbles and Stones

Being a natural material, the slabs differ from one to another, from block to block, from quarry to quarry. In particular, they differ in tones, colors, intrusions, stains, and veins. Each slab must be considered an exclusive piece, gaining value from its uniqueness. The material can change with signs of aging, acquiring a new mature and elegant aesthetic quality.

CEPPO

The Ceppo is a monogenic dolomitic breccia belonging to the clastic sedimentary rock family. The Ceppo di Grè is a very rare stone extracted from Lake Iseo and has a characteristic grey-blue color.

OSTUNI TRAVERTINE

Stone from the Travertine family, its distinctive feature is the very light color that the name Ostuni is derived from.

BOTTICINO

Botticino is a veined and uniform beige marble from Italy, mainly from Brescia. It is a carbonate rock with high technical resistance and great compactness.

OLIMPO STRIATO

Olimpo Striato is a marble with Hellenic origins, characterized by elegant longitudinal stripes. The material's coloring varies from white, to grey, to black, and the veins' extreme natural regularity is one of the parameters that characterizes this marble's quality.

LEAF RUST

Leaf Rust is a marble with a water surface finish that gives it more light and clarity. The external treatment of this marble consists of a superficial scratch, giving the Leaf Rust the famous texture that characterizes it.

BARDIGLIO

Bardiglio Nuvolato marble is a compact dark grey marble. The name "Nuvolato" comes from the presence of irregular veins in a parallel pattern.

ARABESCATO OROBICO

Arabescato Orobico marble is a crystalline calcareous rock composed mainly of calcium carbonate. The Arabescato Orobico has different shades of grey that vary from slab to slab.

STEVEN BLACK

Steven Black marble is a particular selection of black slabs extracted from a quarry in northern Italy. Steven Black has different shades of black that vary from slab to slab.

LAVA STONE

Originally from Etna, lava stone is a natural stone containing various minerals which can release gas during high temperature cooking. The gases can mark the surface with bluish spots, more evident with light glazes. These imperfections add additional beauty to the product.

Metals

Creative research and experimentation find the perfect companion in metals and their multifaceted souls. The characteristic cold feeling yet warm look, resistance yet flexibility, are the material's natural opposites, resulting in incredible finishes thanks to traditional craftsmanship fused with avant-garde techniques.

BURNISHED BRASS

Burnishing is a natural oxidation process performed manually by immersing each piece in a tank with the reagent that oxidizes the brass. Once the burnishing process is complete, the brass is covered by a transparent varnish to preserve its properties. Burnished brass is highly resistant to corrosion and is suitable even in difficult environmental conditions. The material's richness, unique color and shine vary based on the manual manufacturing process.

ACIDATED IRON

Production is carried out manually through an etching process on an iron plate, subsequently stopped to create unique aesthetic effects. Five coats of two-component polycrylic paint are then applied. The clear extra-glossy varnish maintains its brilliance over time, protecting the iron from weathering and yellowing.

Leathers

Exteta is passionate about leather and its natural way of acting, reacting, and interacting with time and space. Different feelings, looks, and finishes change the material in incredible ways, making it one of the most stunning and surprising outdoor companions.

NATURAL

Natural leather is an aniline-dyed skin, treated with a special water repellent process to preserve its softness and protect it from water. It is the first natural leather of its kind for external use.

CUOIO

Saddle leather is made of prestigious vegetable tanned cowhide using an ancient process perfected by expert craftsmen. It is also treated with a special water repellent process to preserve its softness.

SHARK

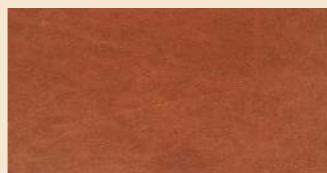

Shark is a printed cowhide with uniform grain and is treated to resist weathering. Depending on the production batches, the natural differences in the leather's color create a variety of unique aesthetic effects.

NABUK

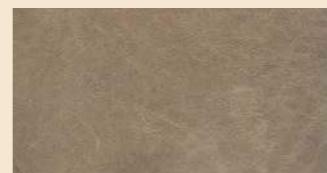

Nabuk is an aniline-dyed skin, treated with a special water repellent process to preserve its softness and make it water repellent.

Fabrics

Outdoor fabrics are designed and created for outdoor use. Our fabrics have been selected for their resistance, comfort, and ease of cleaning. Thanks to pigments added during the production of the fibers, they guarantee the best durability over time as well as high resistance to mold. The fabric colors can vary in tone with sun exposure.

SUNBRELLA (EXTRA AND SUPER)

Unexpected and inspiring, this collection frees the imagination and stimulates creativity with endless possibilities. It provides architects, decorators, and designers alike with an infinite range of subtle and sophisticated color and material combinations.

EXTETA (SUPER)

Exteta presents its new collection of outdoor fabrics, characterized by soft and resistant fibers, with colors inspired by natural elements.

LORO PIANA (PREMIUM)

Our Premium fabric collection presents high performing and high-yield Loro Piana Dehors Performance fabrics. The products are easy to maintain, perfect for dressing up quality outdoor environments. The proposal focuses on a variety of structures, including plain, basketweave, twill, and stripe as well as a play on compact, versatile aspects, from complex to simple weaves. Functionality and comfort are combined with color, in sober beige nuances for twill and stripe, and in brighter nuances, such as reds, light blues, and cobalt blues.

Designers

Massimo Castagna

After his architectural studies concluded in 1984 at the Polytechnic University of Milan, Massimo Castagna, a determined architectural mind, took a very short step towards starting of his professional career. In 1986, he founded the studio AD Architettura, which still today follows important projects for international and historical design brands. In the world of architecture, his name was legitimized soon after with high caliber projects including the "Pyramid" laboratory designed for the scientific committee Everest-K2-CNR and realized for the National Council of Research. Installed in 1991, it is still operational in Nepal at a height of 5050 meters. The biggest collaborations and continued successes have also brought forth Massimo Castagna's strong identity in the world of design. He is artistic director of some of the most important brands of the interior design sector and the products that he creates are always recognizable, with their strong and decisive features and passionate search to achieve new moods and sensations that distinguish his original work. Beyond their visual appeal, Massimo Castagna's signature architecture, use of space, and products evoke many emotions. Among others, he has collaborated with Acerbis International, Ceccotti Collezioni, Exteta, Gallotti&Radice, Giorgetti, Henge, knIndustrie, Minotti poltrone e divani, Rossana Cucine.

Ludovica + Roberto Palomba

From the beating heart of Milan, a captivating sense of design charms the world. In 1994, two architects, Ludovica Serafini and Roberto Palomba, founded Palomba Serafini Associati. Internationally celebrated by the world of architecture, the duo has received many awards and recognitions, including the Compasso d'Oro ADI Award, the Elle Decoration International Design Award, the Red Dot, the Design Plus, the Good Design Award, and the German Design Award. They also coordinate exhibitions and architectural work around the world, cooperating and managing the art direction for some of the most beloved brands. The label Ludovica + Roberto Palomba collaborates with worldwide design names, such as Antolini, Bisazza, Boffi, Brix, Cappellini, Dornbracht, Driade, Elica, Elmar, Exteta, Fiam, Flaminia, Foscarini, KitchenAid, Kos, Laufen, Lema, Plank, Poltrona Frau, Rapsel, Redaelli, Salviati, Sawaya & Moroni, Samsung, Schiffini, Tubes, Valli & Valli, Viccarbe, When Objects Work, Zanotta, and Zucchetti.
